DICTATED TO M.M.C.

JERSEY CITY, N. J. Nov. 22, 1900.

TELEPHONE NO. 250.

Mr. R.W. Pope, Sec'y.,
 American Inst. of Electrical Engineers,
 #26 Cortlandt St., N.Y.

Dear Sir:-

I am in receipt of your letter of Nov. 19th and in reply would respectfully ask, that you inform the Board of Examiners, that I have been continually engaged in electrical work since graduating from the Newark Technical School.

I believe I have kept posted regarding the electrical development in all its branches or as far as might reasonably be expected. I have in my possession almost every standard book on electrical matters, I believe I am competent to tell the good from the bad without reciting or giving names of recognized standard books. The business I am now engaged in brings me in direct contact with nearly all of the electrical industries and with every branch where electro-magnets are used. I am constantly required to supply complete specifications for the Telegraph, Telephone, Electric Arc light, Motor, Transformer and Rheostat Manufacturers, and my business now covers a wide range wherein I am required to, at all times, supply from fifty to one-hundred varieties for these Manufacturers.

Regarding his Studies etc

The Varley Duplex Magnet Co.

Mr. R.W. Pope,

Date Nov. 22, 1900

I have never had opportunity to prepare any Technical article whereby the Examiners could judge of my qualifications, other than the little matter I have written and published in part three of book on "The Electro-Magnet" second edition. This book will be completed by December first and before the first of next week, I will send you a copy of same. In third edition, I am going very deeply into the subject and if the Board of Examiners think best, it is quite agreeable to me, that the matter of my transfer from associate to full member lay over until some future date.

Yours very truly,

VARLEY DUPLEX MAGNET COMPANY

R. Varley

President
