

C. S. I. Co. Ltd.

WIRELESS TELEGRAPHY ACTS, 1904 AND 1906.

Application for License.

1. Full name and address of company or person by whom the license is desired.
2. Particulars of the situation of the station or stations to which the license would apply.
3. Particulars of any other station or stations with which it is desired to carry on communication.
4. Particulars as to ownership or occupation of each station mentioned in paragraphs 2 and 3.
5. Particulars of the purpose or purposes of the installation to which the license would apply, as, for example, whether it is intended solely for experiments.
6. General description of apparatus to be used at each station, including* particulars of the wave lengths to be used (in metres), the source of power and maximum power available, and the maximum power taken by the transmitting instruments (current and voltage).

If it is desired to use the apparatus for other than experimental purposes the following additional particulars should be given :

(a) Normal range of signalling

(1) by night,

(2) by day.

(b) Description of receiving apparatus.

(c) If it is proposed to use an alternator, number of cycles per second.

* *Note.*—In the case of minor experimental installations it will suffice to give the approximate current and voltage to be used.

7. Any other particulars indicating the nature of the installation, and the circumstances in which it is to be used.

8. Term for which license is desired (such term not to exceed that covered by the Wireless Telegraphy Acts, viz.: until the 31st of December, 1909).

The undersigned hereby applies for a license for an installation of Wireless Telegraphy as described above.
