

IEEE TRANSACTIONS ON

GEOSCIENCE ELECTRONICS

OCTOBER 1969

VOLUME GE-7

NUMBER 4

Published Quarterly

SPECIAL ISSUE—

FIRST ANNUAL INTERNATIONAL GEOSCIENCE ELECTRONICS SYMPOSIUM (SELECTED PAPERS)

INTRODUCTORY REMARKS *A. A. J. Hoffman* 178

CONTRIBUTIONS

Remote Sensing

Comments on Remote Sensing *R. Giacconi and B. Harris* 179
Mapping the Earth with Elastic Wave Holography *D. Silverman* 190
The Design of a Resources Survey System *M. Richter* 200

Environmental Pollution

Control of Air Pollution Through Process of Law *M. H. Green* 206
Control of Pollution from the Generation of Nuclear Power *W. de Laguna* 212
Air Pollution—The Relationship Between Health Effects and Control Philosophy *E. J. Cassell* 220

Oceanographic Instrumentation

A Buoy Supported Acoustical Data Acquisition System *H. Waugh, Jr.* 226
Time Variation of the Rough Ocean Surface and its Effect on an Incident Laser Beam *C. E. Prettyman and M. D. Cermak* 235

Meteorologic Instrumentation

Measurements of Wind Speeds with an Optical Crossbeam System *V. A. Sandborn and D. J. Pickelner* 244
Fog Droplets in Electrostatic Field *P. C. Luan and J. B. Jordan* 250

Satellites as Instruments and Platforms

A Miniature Two-Axis Fluxgate Magnetometer *M. H. Acuna and C. J. Pellerin* 252
Geodetic and Geophysical Applications of Laser Satellite Ranging *C. G. Lehr* 261
Absolute and Differential Temperature Monitors Developed for Apollo Space Experiments *E. E. Swartzlander, Jr.* 267
