Actions Taken

1. Non-member Secretary. Donald G. Fink was asked to serve as non-member secretary of the Committee.

2. Regional Boundaries. W. E. Peterson (IRE) presented a report, prepared by himself and Bradley Cozzens (AIEE), which proposed for discussion tentative boundaries for the seven IEEE regions in North America. The Committee proposed modifications as follows:

   a. The Eastern half of Wyoming to be made a part of Region 5.
   b. The Eastern part of Michigan to be made a part of Region 4.
   c. The State of Virginia, except areas directly adjacent to Washington, D. C., to be made a part of Region 3.

   It was agreed that the setting of Regional boundaries need be definite at this time only to the extent of assisting in the selection of candidates for Regional Director. It was further agreed that the Regional Directors, when nominated, would consult with local groups affected by the setting of Regional boundaries, and that definite boundaries would be established by the IEEE Executive Committee after recommendations were received. Specifically mentioned were four questions:

   a. Whether the United States of Mexico should be part of Region 5 or Region 9.
   b. The boundary within the State of New Mexico.
   c. The boundary within the State of Louisiana.
   d. In Canada, questions concerning the regional assignment of British Columbia and the City of Windsor, Ontario.

   Mr. Peterson agreed to supply to the Committee a list of areas within the Regions, as revised, and a map showing the Regional boundaries, as revised.

3. Public Relations. Co-Chairman Chase presented a proposal from J. J. O'Connor, Chairman of the AIEE Public Relations Committee concerning the establishment of public relations channels for the Committee. The proposal had been discussed with Dr. D. E. Noble, Chairman of the IRE Public Information Committee and had his concurrence. It was agreed that the firm of Raymond C. Mayer and Associates, which handles public relations for AIEE, would be the channel for release of publicity material from the Committee, and that members of the Committee would refer inquiries to Mr. Mayer (he can be reached through a tie-line with AIEE Headquarters, New York, telephone 212-PL 2-6800). Mr. Mayer will take direction from Mr. O'Connor and Dr. Noble. The Secretary of the Committee will provide information for publicity releases directly to Mr. Mayer, as approved by the Committee. No publicity information would result from the present meeting of the Committee, and Mr. Mayer would inform members of the press making inquiries that no comment, confirmations or denials would be made at this time. The Secretary communicated these instructions in person to Mr. Mayer. The cost of this service will be borne by AIEE. Lists of AIEE/IRE personnel to receive releases were approved.
4. **Student Journal.** In view of the opening of colleges in September, it was agreed that immediate steps must be taken with respect to student publications. It was agreed that there should be only one such publication, the Student Journal, that AIEE news would be included in it as soon as possible, that an article on developments in electrical power would be included in the first available issue. The remaining funds in the AIEE Student Publications budget (estimated at $12,500) would be transferred to IRE to meet additional expenses in publishing the Student Journal. It was further agreed that Student Members of AIEE and IRE would be informed at the opening of school that they would receive the Student Journal upon payment of Student dues, that the Proceedings of the IRE would be available to students at the special subscription rate of $4.00 for 12 issues, and that Electrical Engineering would be available at a special student rate of $2.00 for 12 issues. A letter outlining the progress of the merger and stating these arrangements would be printed in the September issue of the Student Journal under the signatures of Presidents Haggerty and Teare. The Secretary agreed to prepare this letter and to acquaint Ted Hunter of the new policy with respect to student publications.

5. **Symbol and name.** In view of the urgency of preparing the slate of Officers and Directors, it was agreed to defer discussion of the emblem and name of the Institute to a later meeting.

6. **Nominations.** The following nominations were made for officers of the IEEE:
