Re: Display of the IEEE Milestone Plaque on the Bar Code at Drexel University
Dear Sir or Madam:

I am pleased to advise that Drexel University has agreed to install the IEEE Milestone Plaque on the Barcode in the Bossone Research Enterprise Center (31st street and Market Street Philadelphia, PA 19104). Please accept this letter as our consent for a permanent display of the plaque in a visible position clearly observable by passersby in a high traffic area. The current plan is to install the plaque on an otherwise-bare wall in an area which is used daily by students for work, study and between-class meals, and where we hold many public events (see attached pictures – the plaque would be installed halfway between the openings in the wall).

While not anticipated at the present time, we would like to note that should this venue need to be re-purposed or become otherwise unavailable, Drexel University will make all efforts to locate a close-by similarly visible location appropriate for the subject and the physical dimensions of the plaque.

Drexel University is pleased to be the venue of this milestone and thanks the IEEE for approving it.

Very truly yours,

Bruce A. Eisenstein, Interim Dean
