

A MODERN AIRBORNE NAVIGATIONAL AID RADAR

TUESDAY, AUGUST 5TH, 7:30 PM

SCIENCE AUDITORIUM, RM 5101

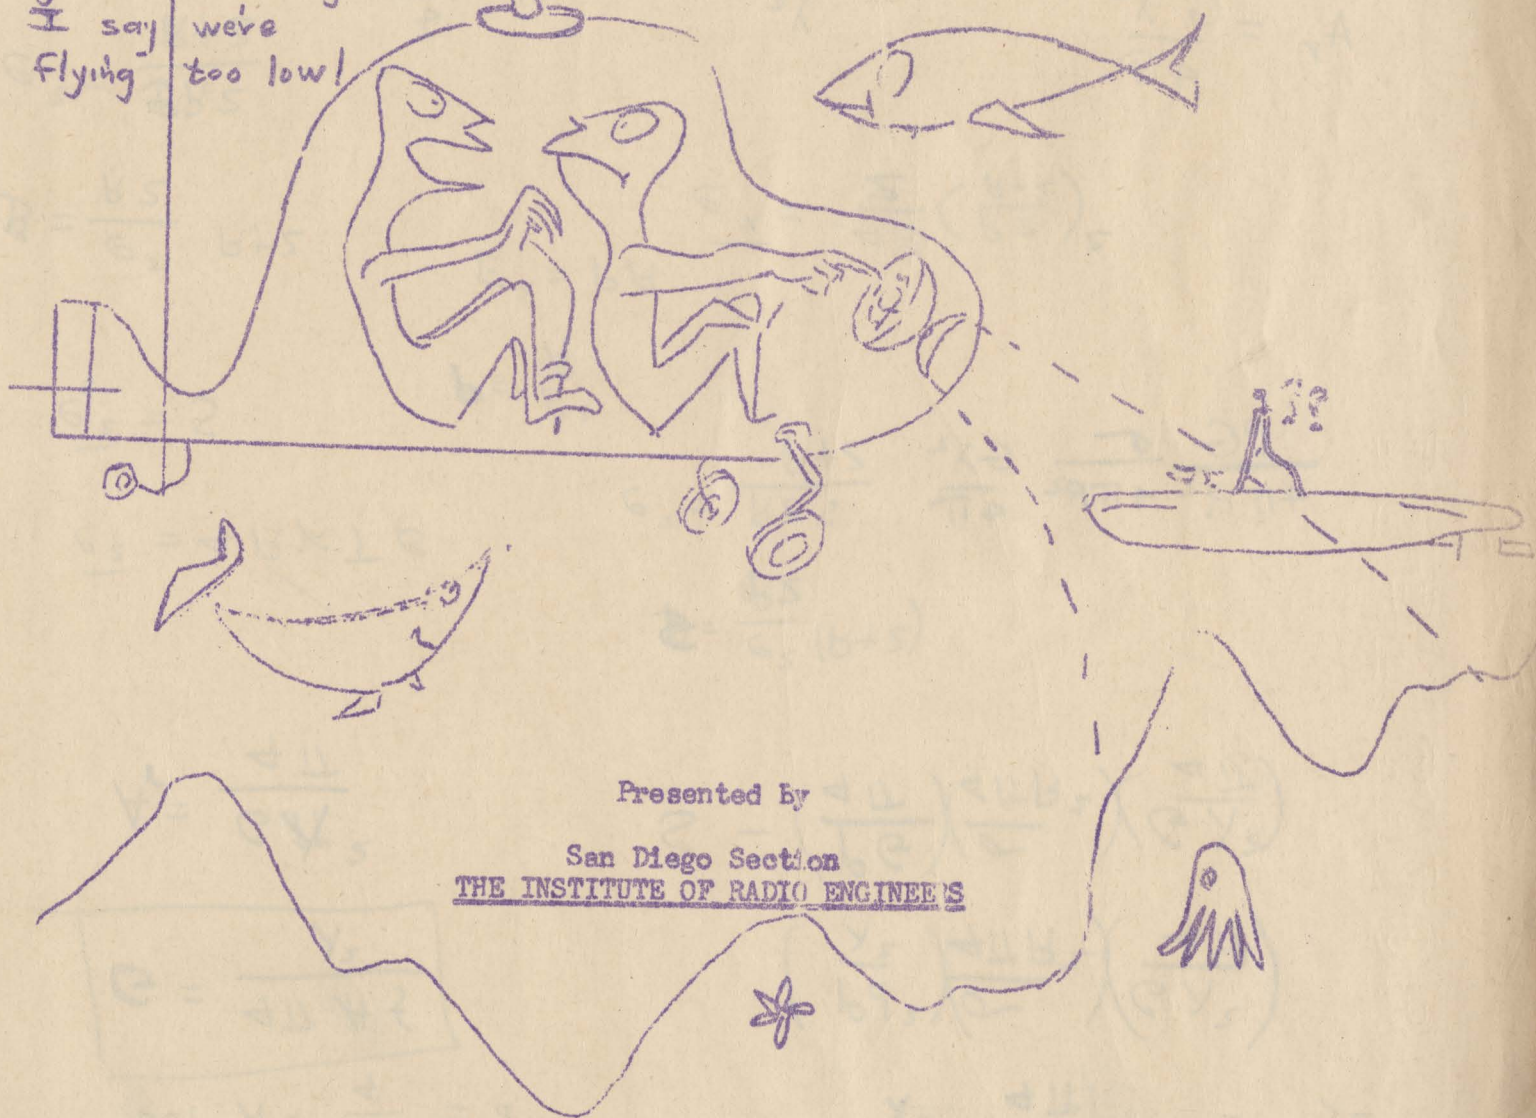

San Diego State College

illustrated talk by

MR. FREDERICK G. SUFFIELD,

Manager of Engineering, TRANSCO Products

I don't care WHAT
your radar says -
I say we're
flying too low!

Presented by

San Diego Section
THE INSTITUTE OF RADIO ENGINEERS

Mr. Suffield will describe the lightweight AN/APS-42 airborne mapping radar. He has played a prominent part in developing this equipment to the point where it is being procured in large quantities for use in transport and cargo aircraft. Following the talk, an informal panel discussion will be held. Members of the panel include:

J. L. Bowers, Chairman
Lloyd Walden
Owen Olds
L. H. Orpin

Convair
N.E.L.
Ryan
Convair

This talk will be of general interest to members of aircraft and electronics professions. Guests or visitors will be most welcome. No admission charge.
