Re: Imminent Death of A. W. Berresford

Dear Sir:

We have the unhappy task of informing you that our distinguished past president Arthur William Berresford of 276 Riverside Drive now lies so ill that neither his doctors nor his family expect his life to be extended for more than a few hours at most. Hence you may also at any moment now have occasion to use the attached biographical information which we release to you hereby subject only to your receipt of formal death notice and funeral information which in due course will come to you directly from Mr. Berresford's family or representative.

Mr. Berresford is an honored past president of the American Institute of Electrical Engineers (1920-21) and a distinguished electrical engineer widely known in the electrical industry and elsewhere.

Very truly yours,

G. Ross Henninger,
Editor.

S.
