GUEST SPEAKER

Edwin H. Snyder
President of Public Service Electric
and Gas
Hazeltine is a familiar sight along the length of Long Island.

Our electronic expertise extends a lot further.

Our IFF Systems... Radar Systems and Displays... ASW and Sonar Systems... Data Processing Systems... and Spacecraft Imaging Devices are only a part of our broad electronics expertise used by government agencies, NATO and foreign governments, and by industries here and abroad.

Our greatest asset is the quality of our engineering staff. If you like working in small groups on large electronic problems where unconventional approaches are called for, and if you are qualified in any of the areas listed below, let us hear from you.

RADAR ENGINEERING. Senior openings in Radar and ECM systems design. Intermediate and junior openings in RF and IF solid state circuit design. Junior openings in general solid state circuit design.

DISPLAY DEVELOPMENT. Engineers with 5 or more years of experience and general background in CRT and storage tube work.

RFI ENGINEERING. Evaluate equipment for RFI spec compliance, provide design guidance. Graduate EE with experience in RFI analysis and practice.

CIRCUIT DESIGN. BS in EE (MS preferred), with 2 or more years experience in the design and development of solid state circuitry for military electronic systems. Assignments in diversified programs working from specification to prototype.

SYSTEMS ENGINEERING. Graduate EE required with several years experience in design of military systems involving RF, data processing and display components. Background in logic or equipment design and familiarity with MIL specs desirable.

FIELD ENGINEERING. Engineering representative at field site where Hazeltine equipment is installed. BS in EE or Physics required, with one or more years practical experience in installation, maintenance or servicing electronic systems and equipment. Military experience in electronics preferred.

Write in confidence to Mr. W. Speer

CALENDAR

Wednesday, February 9

N. J. AUTOMATIC CONTROL GROUP  
8:00 P.M.—“Large-Signal Design & Evaluation of  
Complex Non-Linear Control Systems”  
Dr. Andrew U. Meyer, Newark College of Engineering  
At Auditorium of General Precision Inc., Little Falls, N. J.

Thursday, February 10

N. Y. GAES  
8:00 P.M.—“Fuel Cells Used on the Gemini Series of Spacecraft”  
Speaker: A leading scientist from General Electric Co.  
At Wilkie Memorial Auditorium, 20 West 40th St., N. Y. C.

Tuesday, February 15

7:00 P.M.—“The World Trade Center”  
Joseph R. Loring, Joseph R. Loring Associates  
Fred H. Wilkin, Port of N. Y. Authority  
At United Engineering Center, Room 110 to 113, 345 East 47th St., N. Y. C.

N. J. COMTEC GROUP

8:00 P.M.—“Adaptive Communication”  
Dr. Michael J. DiToro, Cardion Electronics Inc.  
At Arnold Auditorium, Bell Telephone Labs., Murray Hill, N. J.

P.G.P.M.P. & P.G.R.

8:00 P.M.—“Army Activities in Development of Satellite Communications”  
Peter J. Kennedy, U. S. Army Satellite Communications Agency  
At Brass Rail, 100 Park Ave., N. Y. C.

Wednesday, February 16

N. Y. COMTEC

7:00 P.M.—“Satellite Communications Earth Stations”  
W. L. Glomb, ITT Federal Labs.  
At N. Y. Telephone Bldg., 140 West St., N. Y. C.

JERSEY COAST

8:00 P.M.—“New Telephone Services with the Electronic Central Office”  
Raymond W. Ketchledge, Bell Telephone Labs.  
At The Admiral's Table, State Highway No. 35, West Deal, N. J.  
Social Hour 6:00 P.M., Dinner 6:45 P.M., IEEE Section Awards 8:00 P.M.  
Tickets: Price per ticket is $4.85, including gratuity. For reservations call (201) 542-1141.

Thursday, February 17

N. Y. COMPUTER GROUP  
8:00 P.M.—“The Nervous System Explored By Neural Models, Automata Theory”  
Leon D. Harmon, Bell Telephone Labs.  
At IBM Bldg., 390 Madison Ave., N. Y. C.

ENGINEERING MANAGEMENT GROUP

8:00 P.M.—“Systems Management Problems in American Power Industry”  
Mr. A. F. Gabrielle, American Electric Power Service Corp.  
At United Engineering Center, Room 125, 345 East 47th St., N. Y. C.

Tuesday, February 23

L. I. N. Y. AUTOMATIC CONTROL GROUP  
8:00 P.M.—“System Transient Performance on Large Interconnected Power Systems”  
Charles Concordia, General Electric Co.  
At Polytechnic Institute of Brooklyn Graduate Center, Route 110, Farmingdale, L. I. N. Y.

Wednesday, March 16

N. Y. COMTEC & TRANSPORTATION DIV.

7:00 P.M.—“N. Y. C. Traffic Control Program”  
N. Y. Traffic Commissioner Barnes  
At Carnegie International Center Bldg., N. Y. C.
NORTH JERSEY SECTION SPRING STUDY GROUP
C. P. M. (CRITICAL PATH METHOD)
THE MODERN PLANNING TOOL

For the first time in our history, we are offering a Study Group tailored to those in planning, engineering and management. A powerful management technique has been perfected for planning, scheduling, and controlling all types of projects such as maintenance, installation, construction, and engineering.

This Study Group is intended for men in industry who plan maintenance, installations of equipment, construction, and associated functions. Maintenance shutdowns that were planned with C.P.M. have made substantial savings in both dollars and downtime to industry.

This important C.P.M. technique will be given in practical, easy-to-understand terms, numerous examples, case histories, sample problems, and questions and answers. You will receive a practical picture of what C.P.M. is and how to compute it. Other planning tools such as PERT will be discussed. Participation in this Study Group should enable you to offer savings and greater efficiency to your operation. No previous experience is assumed necessary. Our presentation makes this tool valuable in any management, engineering or foreman level.

REGISTRATION INFORMATION
TIME: 7:00-9:00 starting Tuesday, March 15, 1966 and ending Tuesday, April 19, 1966.
LOCATION: Public Service Electric and Gas Company — Room 3171A, 80 Park Place, Newark, New Jersey.
REGISTRATION FEE: $20.00 to Members IEEE, ASME, ASCE, AIME, etc. $25.00 to Non-members.

ADVANCED REGISTRATION FORM
Name ................................................................. Position ........................................
Technical Society Affiliation ...........................................................
Company Affiliation ................................................................
Location ..............................................................................
Telephone ................................................................. Member $15.00 Non-member $20.00
Send Registration Forms to and/or call the following for copy:
Mr. C. G. Engstrom
Public Service Electric & Gas Co.
90 Park Place Newark, N. J. 622-7000 Ext. 2603
Please make checks payable to: North Jersey Section IEEE

NORTH JERSEY SECTION ANNUAL BANQUET-DANCE
SATURDAY FEBRUARY 19, 1966 6:00 P.M. to 1:00 A.M.
GOVERNOR MORRIS HOTEL
2 Whippany Road Morristown, N. J.

RESERVATION COUPON:
To: Mr. Merle M. Irvine
Room 3E127
Bell Telephone Laboratories
Whippany, N. J.

Enclosed also is a stamped, self-addressed envelope to expedite return of the tickets to me. (If reservation coupon is received after February 5, or without stamped self-addressed envelope or payment, tickets will be held at the door.)

I would appreciate having the following member(s), who I expect to request reservations, seated at my table: ..............

Thanks —

ANNUAL SECTION DINNER AND DANCE
SATURDAY FEBRUARY 19, 1966 6:00 P.M. to 1:00 A.M.
GOVERNOR MORRIS HOTEL
2 Whippany Road Morristown, N. J.

RESERVATION COUPON:
To: Mr. Merle M. Irvine
Room 3E127
Bell Telephone Laboratories
Whippany, N. J.

Enclosed is a stamped, self-addressed envelope to expedite return of the tickets to me. (If reservation coupon is received after February 5, or without stamped self-addressed envelope or payment, tickets will be held at the door.)

I would appreciate having the following member(s), who I expect to request reservations, seated at my table: ................

Thanks —

ENGINEERING MANAGEMENT GROUP
A CALL FOR PAPERS
The April 21, 1966 meeting will cover an open symposium on Engineering Management. You are invited to present a 15-minute paper (1500 word maximum). An abstract of your paper or any questions should be sent before Feb. 28, 1966 to Donald Selwyn, ITT Federal Labs., Nutley, N. J. (201) 284-0123. Non-members invited.
EDUCATIONAL PROGRAM—SPRING—1966

REVIEW STUDY GROUPS — FOR PROFESSIONAL ENGINEER EXAMINATIONS

This program is designed to prepare candidates for Professional Engineer License examinations in New York and New Jersey. The N. Y. State Board permits graduates of approved schools to take Parts I and II and qualify for “Engineer-in-Training”.

ENDORSED BY NYSSPE

STRUCTURAL PLANNING AND DESIGN (IEEE-ASME)
Review for Part I, N. Y. Exam., Part II, N. J. Exam. Planning, design, construction of buildings and similar structures in timber, steel and concrete, including beams, columns, foundations, piles, girders, riveted and welded sections. Intensive work in problem solving techniques with emphasis on the AISC and ICI codes. Printed notes available.
MONDAYS, Starting Feb. 14, 1966, 6:15-8:30 P.M., 18 Sessions
North Cafeteria, 19th fl., Con Edison Co., 4 Irving Place, N. Y. C.

BASIC ENGINEERING SCIENCES (ASME-IEEE)
TUESDAYS, Starting Feb. 8, 1966, 6:30-8:30 P.M., 19 Sessions
Auditorium, 19th fl., Con Edison Co., 4 Irving Place, N. Y. C.

MECHANICAL ENGINEERING (ASME)
Review for Mechanical Engineering Section of Part III, N. Y. Exam. Application of mechanical engineering principles to modern practice, shafts, flywheels, springs, gears and other machine elements, steel and heat treatment, internal combustion engines, air compressors, gas turbines, steam power plant cycles and equipment, refrigeration, heat transfer, air conditioning and other special subjects.
WEDNESDAYS, Starting Feb. 9, 1966, 6:30-8:30 P.M., 18 Sessions
Rm. 240, Ebasco Bldg., 2 Rector St., N. Y. C.

ELECTRICAL ENGINEERING AND APPLICATIONS (IEEE)
WEDNESDAYS, Starting Feb. 9, 1966, 6:30-8:45 P.M., 18 Sessions
Rm. 1427, Con Edison Co., 4 Irving Place, N. Y. C.

ENGINEERING ECONOMICS AND PRACTICE (IEEE-ASME)
Review for Engineering Economics Section of Part III, N. Y. Exam. Economic comparisons, fixed and operating costs, accounting and cost analysis, valuations, contracts, etc.
THURSDAYS, Starting Feb. 10, 1966, 6:30-8:30 P.M., 18 Sessions
Auditorium, 19th fl., Con Edison Co., 4 Irving Place, N. Y. C.

REGISTRATION

Committee, I.E.E.E. Long Island Lighting Co., 175 E. Old Country Road, Hicksville, N. Y. 11801
For courses No. 16, 19, 20, 21 & 22
make checks or money order payable to:
“POWER & IND. GROUP, N.Y. SECT., I.E.E.E.”
and mail to: I. M. Berger, Vice Chairman, Educational Committee, I.E.E.E., N.Y.C. Transit Authority, 3311 Giles Place, Bronx, N. Y. 10463, Tel. 852-5000 Ext. B 4247.

For courses No. 17 & 18
make checks or money order payable to:
“ASME METROPOLITAN SECTION”
and mail to: G. Evans, Vice Chairman Educational Committee A.S.M.E., Zurn Industries, P.O. Box 1099, Mountainside, N. J.

REG. FORM ON BACK PAGE
Please post on bulletin board—

**EDUCATIONAL PROGRAM**

**COURSE NO. 12**

**AUTOMATION IN INDUSTRY AND GENERATING STATIONS**

**MONDAYS, 6:30 to 8:30 p.m. Starting Feb. 28, 1966**

Ebasco Auditorium, 2 Rector Street, New York, New York

Course Coordinator: E. Eldridge, Thomas & Betts Co.
Tel. (201) 354-4321

A comprehensive review of a wide range of automated industries is offered in this course. The use of computers and other control devices in manufacturing and production facilities will be covered. Computers and their operations in the specific application in these industries along with practical applications to various areas.

1. **Feb. 28. Principles of Automatic Control**
   Speaker: Dr. H. A. Fertig, Leeds & Northrup, North Wales, Pa.

2. **Mar. 7. Process Control Components and Applications**

   Speaker: Dr. R. Vichnevetsky, Electronics Associates, Princeton, N. J.

5. **Mar. 28. Numerical Control of Machine Tools**

6. **Apr. 4. Automatic Control of a Major Production Line**
   Speaker: G. Murie, Ford Motor Co., Birmingham, Michigan

7. **Apr. 11. Automatic Control of a Generating Station**
   Speaker: E. N. Schwalje, Public Service Elec. & Gas Co.

8. **Apr. 18. Automation of an Aircraft Production Line**
   Speaker: from Grumman Aircraft Engineering Corp.

   Speaker: W. E. Behrs, Radio Corp of America

10. **May 2. Trip to Con Edison Automated Warehouse—Astoria Plant**

**COURSE NO. 13**

**SPECIFICATIONS AND ESTIMATING**

**TUESDAYS, 6:30 to 8:30 p.m. Starting March 1, 1966**

Brooklyn Union Gas Co. Auditorium, 195 Montague Street, Brooklyn, N. Y.

Course Coordinator: M. Isaacs, Amman & Whitney
Tel. (212) WA 4-8282

This course will cover the basic role specifications play in the total construction concept. Discussions will follow on a general outline, specifications and estimating. Lectures will be given by a panel of speakers from the Metropolitan New York Chapter of the Construction Specification Institute except as noted.

1. **Mar. 1. Requirements of Specifications**
   Relation to and part of general contract. Role of specifications in construction concepts.

   Information and requirements for making and submitting bids.

3. **Mar. 15. General Considerations**
   Insurance, Payments, Extras, Partial and Final Completion.

4. **Mar. 22. General Specifications**
   Work required, Condition, Precautions, Safety, Governmental Regulations, Workmanship, Inspection, and Material Approval.

5. **Mar. 29. Construction Specifications**
   Owners detailed requirements for construction. Divided by type and class of work.

6. **Apr. 5. Drawings**
   Relation to specifications — Types and Classes of drawings.

   Preliminary, comparative, Engineers estimates — use of drawings and specifications.
   Speaker: from Bechtel Corporation

   Special precautions, temporary facilities, labor units.

   Pricing, labor and job costs, profit, overhead, extras, design changes.
   Speaker: from Bechtel Corporation

10. **May 3. Estimating Part IV**
    Specific estimating problem—The Kitchensink Building.
COURSES ARE OPEN TO THE PUBLIC

- Special Study Groups

COURSE NO. 14

SWITCHGEAR AND CIRCUIT BREAKERS

WEDNESDAYS, 6:30 to 8:30 p.m. Starting March 2, 1966
Con Edison Co., Rm. 1701, 4 Irving Place, New York, N. Y.
Course Coordinator: R. K. Sullivan, Con Edison Co.
Tel. (212) 460-4689

This course provides a comprehensive review of the fundamental theory behind circuit interruption and familiarizes him with the electrical properties, mechanical operation, application and development of switchgear and circuit breakers.

1. Mar. 2. Introduction
   Arc ionization, fundamentals of circuit breakers and switchgear.
   Speaker: L. J. Hollander, New York University

   Voltage recovery, natural frequency of system, effects of resistors and asymmetrical currents.
   Speaker: L. J. Hollander, New York University

   Ratings — current, voltage and frequency.
   Speaker: from ITE Circuit Breaker Co.

4. Mar. 23. Kinematics of Switchgear
   Closing and opening movement, speed, mechanical advantage, link pressure and stored energy.

5. Mar. 30. Medium Voltage Applications
   Air magnetic, air blast, oil and vacuum breakers.

6. Apr. 6. High Voltage Applications
   Air blast, oil, sulfur hexafluoride and vacuum breakers.
   Speaker: R. A. Bednarik, Consolidated Edison Co.

   Design, factory, and field testing.
   Speaker: R. E. Bauer, Consolidated Edison Co.

   Protective and supervisory — line relaying, relay and breaker operating times and schemes.
   Speaker: J. L. Blackburn, Westinghouse Elec. Corp.

9. Apr. 27. Relays & Circuit Breakers—Part II
   Speaker: J. L. Blackburn, Westinghouse Elec. Corp.

10. May 4. New Development in EHV Switchgear Design

MANAGEMENT

THURSDAYS, 6:30 to 8:30 p.m. Starting March 3, 1966
Consolidated Edison Co., Rm. 1101S, 4 Irving Place, New York, N. Y.
Course Coordinator: R. Castenschold, Automatic Switch Co.
Tel. (201) 377-4600

The course will be given by men from top industry management and outstanding academic institutions. Their knowledge and personal experiences will benefit those already in management and also provide a guide to individuals aspiring to become part of management.

1. Mar. 3. General Nature of Management
   Objectives and responsibilities of management to its owners, employees, customers and community.
   Speaker: L. E. Thompson, Associate Director, Research Institute of America

   Principles of good organization and coordination of departmental functions.
   Speaker: D. J. McLaughlin, Associate, McKinsey & Company, Inc.

3. Mar. 17. Effects of Business Size
   Differentiating problems and solutions for small, medium and large business. Adjusting to company growth.
   Speaker: Prof. S. Ran HAND, Ph.D., C.P.A.
   City College of New York

   Executive qualifications, recruiting and developing managers.
   Speaker: J. A. Vaughn, Vice President, Maxson Electronics Corp.

5. Mar. 31. Delegation of Authority

6. Apr. 7. Human Relationship
   Psychology of personnel and labor-management relations.
   Speaker: Prof. J. H. Metzler, Newark College of Engineering

   Participative management, work procedures, incentives, communication and recognition.
   Speaker: Prof. J. H. Metzler, Newark College of Engineering

   Where and how new computer techniques and data processing equipment should be applied.
   Speaker: W. H. Morrow, Jr., Marketing Coordinator, International Business Machines Corp.

   Organizational setups and new programs for greater utilization of engineering and technical talent.
   Speaker: W. M. Goryl, Associate Director, Esso Research & Engineering Co.

10. May 5. Planning Future Strategy
    Planning for present operation, growth, change and emergency — and implementing the decision.
    Speaker: Prof. R. T. Livingston, Columbia Univ. and The Livingston Institute
INDIVIDUAL IMPROVEMENT STUDY GROUP

COURSE NO. 21

Speed Reading for Engineers

THURSDAYS, 6:30-8:30 p.m. Starting Feb. 24, 1966
Room 1806-S Con Edison Co., 4 Irving Place, N. Y. C.

Instructor: E. E. Conio
Assistant to Director of Educational Work, Public Service
Electric & Gas Co. Former member of NYU School of
Commerce faculty. Has over 25 years experience teaching
courses for business and industry.

This course is designed to help engineers to keep abreast
of the literature in their fields, and of their general reading.
It improves reading speed and retention through skills taught
and practiced. It releases reading power held back by inefficient
habits and attitudes. Engineers may expect improved
speed in their reading, greater comprehension and retention
of information, and an insight into the process of reading
which will foster continuing individual growth.

1. Feb. 24. Introduction to Speeded Reading
   Objectives of the course; variables relative to rate, ma-
   terials, and comprehension; Test for diagnosis of indivi-
   dual rate, comprehension, and vocabulary.

2. Mar. 3. The First Step
   Individual analysis; using different methods to find the
   structural patterns of written materials.

   Role of the eyes and eyespan; using verbal and printed
   clues to structure.

4. Mar 17. Paragraph Patterns and Functions
   Using paragraph functions and patterns to identify
   organization and structure in materials.

5. Mar 24. Adjusting Rate
   Using paragraph functions as an aid to achieving optimal
   rate.

6. Mar 31. Article Patterns
   Using the author's organization to get ideas more quickly.

7. Apr. 7. Article Patterns
   Using the author's organization to organize ideas into
   useful sequences and patterns for greater retention.

   Reducing ideas to basic components for more rapid and
   greater retention.

   Reading to "keep up" and "get ahead". Evaluation and
   planning for continued improvement.

10. Apr. 28. Evaluation and planning for continued
    improvement

COURSE NO. 22

Theory and Mechanics of
Technical Reports

WEDNESDAYS, 6:30-8:30 p.m. Starting Feb. 23, 1966
Room 1806-S Con Edison Co., 4 Irving Place, N. Y. C.

Instructor: E. Alcosser, Sperry Gyroscope Co.
A Study Group designed to provide training in the preparation and
presentation of technical reports.

1. Feb. 23. Introduction
   Course description, purpose, communication of ideas.

2. Mar. 2. Written Communication
   Types, purpose and for whom.

3. Mar. 9. The Outline
   Purpose, value, mechanics—Use of

   (General)—Style, grammar, effectiveness.

5. Mar. 23. First Draft—Part II
   (Specific)—Choosing the media, layout, illustrations.

   Draft review, production, final check.

7. Apr. 6. Oral Reports
   Principles of speaking, outline, presentation.

   Use of index cards, timing, use of aids.

9. Apr. 20. Delivery of Student Reports
   Prepare short report (term project) for presentation and
discussion.

10. Apr. 27. Delivery of Student Reports
    Prepare short report (term project) for presentation and
discussion.

EDUCATIONAL PROGRAM—SPRING—1966

Metropolitan Section

ASME
NORTH JERSEY AUTOMATIC CONTROL GROUP

Large-Signal Design & Evaluation of Complex Non-Linear Control Systems

Speaker: Dr. Andrew U. Meyer, Newark College of Engineering
Date: Wednesday, February 9, 1966
Time: 8:00 P.M.
Place: Auditorium of General Precision Inc., Plant 3, Little Falls, N. J.

Dr. Andrew U. Meyer of Newark College of Engineering will speak on "Large Signal Design and Evaluation of Complex Non-Linear Control Systems" at the February 9, 1966 meeting of the Group on Automatic Controls. The meeting will be held at the auditorium of General Precision Inc., Plant 3, 1150 McBride Avenue, Little Falls, New Jersey, at 8:00 P.M.

Abstract:

The designer of non-linear control systems must assure stable dynamic performance for every signal level that may occur. For example, a system that was designed to be stable for small perturbations about its operating points might become unstable in the presence of large transients or disturbances. This may happen especially in systems with several non-linearities and systems that are complex in structure.

About the Speaker:

Dr. Meyer is an Associate Professor of Electrical Engineering at Newark College of Engineering since September 1963. He was a member of the technical staff of Bell Telephone Laboratories at Whippany, New Jersey where he conducted research and development in satellite attitude control auto-pilot design problems for missiles. He commenced his undergraduate training in Germany and attended Northwestern University from which he received his MS in 1958 and his PhD in 1961, both in Electrical Engineering.

NORTH JERSEY SECTION

EXECUTIVE COMMITTEE NOMINATIONS

The Nominating Committee of North Jersey Section IEEE met on December 8 and selected the following candidates for the 1966-67 IEEE Executive Committee of the North Jersey Section period:

Chairman: S. A. Mallard
Vice Chairman: B. Meyer
Treasurer: J. O'Grady
Secretary: M. Irvine
Members-at-Large: H. Blakeney, J. R. W. Whittle

Respectfully submitted,
A. G. Kandoian, Chairman
A. Parkes
R. McSheeny
J. Schwanhausser
L. J. Varner
Profesor C. Redmon, ex-Officio

STUDENT AFFAIRS

NCE Continues Activities

During the week of December 13 the student branches presented twelve showings of a NASA color documentary film entitled, "The Four Days of Gemini IV." The movie featured Major Edward White's historic space walk and showed the entire Gemini IV mission, including exclusive motion picture shots of the re-entry from within the spacecraft.

On December 17 Mr. Everett D. Hines from Public Service Electric and Gas Company spoke about the electric utility industry. Mr. Hines' talk was entitled, "Creating For the Future."

In a previous issue this column reported the plan to place at the NCE library a file of past EE quizzes as an academic reference. Chairman Jorge Vazquez of the Test File Committee reports the plan now to be in operation. He urges the use of these tests as one would use a reference text.

With this committee and the Feedback Committee reporting successful beginnings, another working committee has been appointed. Its four members are charged with reviewing activities at the branch and recommending methods for report and assignment forms as well as written procedures and instructions.

Junior Class IEEE student members will assume the planning responsibility for the Day and Evening Branches as the spring semester commences. The theme of the program will be technical subjects allied with course material.

NOMINATIONS

The Nominating Committee of North Jersey Section IEEEE met on December 8 and selected the following candidates for the 1966-67 IEEE Executive Committee of the North Jersey Section period:

Chairman: S. A. Mallard
Vice Chairman: B. Meyer
Treasurer: J. O'Grady
Secretary: M. Irvine
Members-at-Large: H. Blakeney, J. R. W. Whittle

Respectfully submitted,
A. G. Kandoian, Chairman
A. Parkes
R. McSheeny
J. Schwanhausser
L. J. Varner

With this committee and the Feedback Committee reporting successful beginnings, another working committee has been appointed. Its four members are charged with reviewing activities at the branch and recommending methods for report and assignment forms as well as written procedures and instructions.

Junior Class IEEE student members will assume the planning responsibility for the Day and Evening Branches as the spring semester commences. The theme of the program will be technical subjects allied with course material.
Ballantine AC-DC Digital Voltmeter

Model 355

Price: $590

1/4% Accuracy f.s. for AC & DC Voltages up to 500 and for mid-band AC Frequencies

Measures Full Scale ac to 10 mV...ac & dc from 0 to 1,000 V

Ballantine's Model 355 is the only digital voltmeter of its type in the U.S.A. with a versatility that makes it ideal for production line and quality control applications.

Use the 355 in place of analog instruments, for example, in reducing personnel errors, for speeding up production. You can depend on Ballantine's high standards of accuracy, precision, and reliability to reward you with savings of time and money the first day you place it in service.

The instrument features a servo-driven, three-digit counter with over-ranging...combines many virtues of both digital and analog voltmeters in one small, compact, economical package. Its large, well-lighted readout with illuminated decimal point, range and mode information, allows fast, clear readings, while the indicator can follow and allow observation of slowly varying signals. The position of the last digit can be interpolated to the nearest tenth, thus avoiding the typical "± 1 digit" restriction of a fully digitized display.

Desire even faster production? An optional foot-operated switch of the Model 355 retains voltage readings, and enables you to cut materially the time between readings. Another aid in reducing personnel errors is provided by an over-range indicator that signals excessive input of the wrong polarity.

N. Y. COMTEC SATELLITE COMMUNICATIONS EARTH STATIONS

Mr. W. L. Glomb of ITT Federal Laboratories will talk February 16, 1966 on "Satellite Communications Earth Stations" at the New York Telephone Building, 140 West Street in New York City. The meeting starts at 7:00 P.M.

Mr. Glomb will make a general presentation of satellite communications systems concepts with emphasis on the role of the medium size station. Material will be based on design, development, fabrication, and over three years of operational experience with seven medium size stations in Brazil, Spain, Hawaii and Continental U. S. with the Moon, Courier, Relay, Telstar, Syncom and Early Bird satellites.

Walter L. Glomb is deputy director of the Space Communication Laboratory at ITT Federal Laboratories, Nutley, New Jersey. He is responsible for system design and analysis involving the company's space communication projects.

Mr. Glomb received his B.S. degree in 1946 and his M.S. in 1948, from Columbia University. He is Executive Committee Chairman of the North Jersey Section of the Institute of Electrical and Electronics Engineers.

THE WORLD TRADE CENTER

Date: Tuesday, February 15, 1966
Time: 7:00 to 9:00 P.M.
Place: United Engineering Center, Room 110 to 113 345 East 47th Street New York City
Speakers: Mr. Joseph R. Loring Mr. Fred H. Wilken Port of New York Authority
The new World Trade Center, with its two 110 story towers each soaring 1350 feet above street level, presents one of the major engineering challenges of the decade.

The major engineering problems encountered, will be discussed, with emphasis upon the electrical systems. A scale model of the center will be available for review and inspection.

N. Y. SECTION THE POWER & INDUSTRIAL DIVISION

OFFERS A 3-LECTURE SERIES ON A TECHNICAL APPROACH TO STOCK MARKET TECHNIQUES

Session 1 — March 17, 1966
1. Introduction of The Technical Approach:
2. Market Cycles:
3. Line Charts:
Session 2 — March 24, 1966
4. Point and Figure Charting:
5. Trend Lines and Trendline Channels:
6. Support and Resistance:
Session 3 — March 31, 1966
7. Reversal and Consolidation Patterns:
8. Market Indicators:
9. Market Tactics:
Open to the Public
Entire Series Course:
$10 for members ASME, IEEE, ASCF, AIEE, AIME, NYSSPE.
$15 for Non-Members.
Contact: L. M. Berger

The Newsletter, February 1966
DC-to-30 MHz performance
AND THE
versatility of 20 plug-ins
with split-screen storage

storage features:
Unparalleled Writing Speed — up to 5 cm/μs, with enhancement.
2 Independent 3x10 cm Display Areas — with separate upper half and lower half controls.
Bistable Storage.
Automatic Erase — with selectable viewing times from 0.5 seconds to 5 seconds. Erase can be selected for recurrent or after-sweep operation.
Erase-and-Reset — with push-button control for erasing display and rearming single sweep. Erase-and-Reset can be controlled remotely, if desired.

other features:
Precision Sweep Delay—from 1 microsecond to 10 seconds.
Wide Sweep Range — 5 s/cm to 0.1 μs/cm (Time Base A) and 1 s/cm to 2 μs/cm (Time Base B). 5X Magnifier extends fastest sweeps to 20 ns/cm (Time Base A) and to 0.4 μs/cm (Time Base B).
Single Sweep — manually, automatically, or remotely.
Full-Passband Triggering — with flexible, easy-to-use facilities.
Simplified Trigger Logic — with lever control of trigger functions.

Size and Weight — dimensions are 17" high x 13" wide x 24" deep; net weight is ≈ 67 lbs.

Type 549 Oscilloscope . . . . . . $2375
(without plug-ins)
The plug-in units range in price from $145 (B high-gain unit, K fast-rise unit) to $1100 (151 sampling unit, illustrated).

Tektronix, Inc.
UNDER-$1000 DIGITAL VOLTMETER TAKES PLUG-INS

Model 3439A all solid state digital voltmeter accepts the full range of Hewlett-Packard's 3440-series plug-in. All six available plug-ins, including the simplest (Model 3441A), provide for dc measurements with manually controlled full scale ranges of 10, 100, and 1000 V. One plug-in adds autoranging and remote ranging (Model 3442A); another adds to these 100-milli-volt and 1 volt full-scale ranges (Model 3443A). Still another gives current and resistance measuring capability (Model 3444A). The fifth (3445A) provides ac voltage-measuring facilities with automatic and remote ranging. The newest plug-in (Model 3446A) adds remote function selection to the AC/DC unit.

Designed for bench and production applications, Model 3439A gives DVM accuracy and multi-function flexibility. Omission of coded printer output and external triggering, and adoption of a fixed sample rate (between 2 and 3 per second) makes possible a price of under-$1000.

The four-digit HP Model 3439A digital voltmeter is silent in operation. Input, with any plug-in, is floating. With its push-button self-check feature it may be recalibrated in a few seconds. The Model 3439A costs $950.00.

For complete information on all Hewlett-Packard products contact your local HP Field Engineer.

HP MAKES CUSTOM CALIBRATION A STANDARD FEATURE

Higher measurement accuracy of microwave power is now available, because custom calibration is standard with Hewlett-Packard's Model 478A Coaxial and Model 486A Waveguide Thermistor Mounts.

Both Calibration Factor and Effective Efficiency are furnished to reduce measurement uncertainty by at least a factor of two, even more when dc substitution techniques are used. For example, Calibration Factor is used as the correction factor for general applications, swept-frequency power measurements, etc., when a tuner is not used; Effective Efficiency is used whenever a tuner is part of the measurement system, whether to tune the mount to the impedance of the transmission line or to the complex conjugate of the source impedance.

Model 478A Thermistor Mount is designed for 50-ohm coaxial systems which operate from 10 Mc to 10 Gc. The HP thermistor pair presents a good match to 50-ohm systems over its full frequency range. No tuning is required, and the Model 478A costs $155.00. Model 486A Thermistor Mounts are designed for 2.6 to 40 Gc waveguide systems. Each carefully designed mount provides a good match over the entire waveguide range and no tuning is required. Model 486A Thermistor Mounts are available from $145.00 to $375.00.

Both the 478A coaxial mount and the 486A waveguide mounts may be used to measure pulse power as well as CW.
