AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
33 WEST 33RD STREET, NEW YORK, N. Y.

APPLICATION FOR TRANSFER TO THE GRADE OF FELLOW.

QUALIFICATIONS FOR TRANSFER.

The qualifications for transfer to the grade of Fellow are set forth in Article II, Section 4, of the Constitution, which is printed on the last page of this form. Applicants are urged to read these extracts carefully in order that they may have a perfect knowledge of the constitutional requirements.

Applicant's name: Edward R. Meyer

Present title or occupation: Chief Engineer, Public Service Production Company

Business address: 60 Park Place, Newark, New Jersey

TRANSFER FEES AND DUES.

Transfer fee from the grade of Associate to that of Fellow, Ten (10) dollars.
Transfer fee from the grade of Member to that of Fellow, Five (5) dollars.
The annual dues for the grade of Fellow are Twenty (20) dollars.

REFERENCES.

Sec. 10 (Constitution). Applicants shall give references as follows:

For the grade of Fellow, to five Fellows.

Should an applicant for the grade of Fellow, either for direct admission or for transfer, certify that he is not personally known by five Fellows, the Board of Examiners may accept, for the deficiency, references to five professional engineers of standing. (This clause has been interpreted to apply only to applicants whose location or conditions of work are such that it is unreasonable to expect them to make reference to members of the institute.)

References should be selected who have personal knowledge of the applicant's engineering experience. As references occasionally fail to reply promptly to inquiries, it is suggested that applicants furnish more than the required number of names.

REFERENCES.

7. Record of professional experience

Dates here

Entered employ of Public Service Corporation as engineering assistant, working on design of electric generating stations and substations. The duties of this position were later expanded to include general supervision of construction work in the field.

June 1903

1906

Appointed field engineer on the design, installation and maintenance of the entire underground conduit and cable system. Subsequently took over other duties with the result that I was made general assistant to the chief engineer and responsible for all details of the work of the Engineering Department.

Sept. 1912

Appointed Assistant to Chief Engineer.

1919

Appointed Assistant Chief Engineer.

1922

With the formation of the Production Company in February, was appointed to the position of Chief Engineer, which position I now hold.

Served on the Underground Systems Committee of the National Electric Light Association for the years 1911-1925 inclusive, and in four years, from 1915 to 1918, was chairman of that committee.

I am now or have been within the past few years connected with the following Institute committees:

Meetings and Papers Committee - Chairman
Publication Committee - Member
Sections Committee - Member
Committee on Award of Institute Prizes - Chairman
Committee on Coordination of Institute Activities - Member
Membership Committee - Member
Annual Summer Convention Committee - Member
Winter Convention Committee - Member
Transmission and Distribution Committee - Chairman
7. Continued.

Special Committee on Contacts with the Public - Member
Executive Committee - New York Section - Chairman
Program Committee - New York Section - Member
Regional Meeting Committee - New York Section - Member
Sub-Committee on Wires and Cables - Member
Sub-Committee on Prime Movers - Member

I have made numerous contributions to the technical press, particularly on electric transmission and distribution. I am the author of the book UNDERGROUND TRANSMISSION AND DISTRIBUTION.

The Public Service Production Company, of which I am Chief Engineer, is engaged in general engineering and construction work, and has handled during the past four years more than $75,000,000 worth of construction work, which involved the design and construction of steam electric power stations and substations, transmission lines, and other work pertaining to electric utility properties. All this work was carried on under my direct supervision.
