Re: IEEE Milestone for the Invention of the Grumman Lunar Module

Dear Howard,

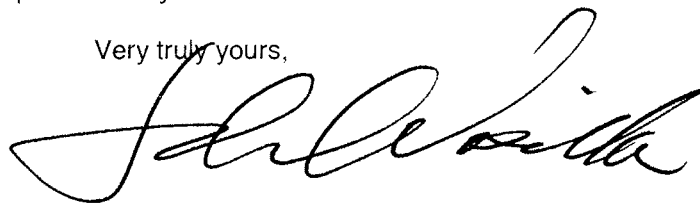

Thank you for your offer to have the IEEE Long Island Section sponsor an IEEE Milestone plaque and dedication ceremony for the invention of the Grumman Lunar Module at Bethpage, NY.

We have reviewed the IEEE History Center, Milestones Introduction, as well as the submission and evaluation process shown at:
http://www.ieee.org/web/aboutus/history_center/milestones_intro.html.

We understand that if the proposal is accepted by the IEEE History Center, that the approximate \$700.00 cost of the plaque will be the responsibility of the Section. If approved, we agree to mount or display the IEEE Milestone plaque recognizing the invention of the Grumman Lunar Module at the Northrop Grumman Aerospace Systems in the Headquarters of the Battle Management and Engagement Systems where it will be viewable by employees and the public.

We also agree to co-host a suitable dedication ceremony including representatives of the IEEE Headquarters, History Center and Section at or near the site of where the plaque is or is to be mounted or displayed. The event may also be publicized by entities of the IEEE.

Very truly yours,

John A. Vosilla
Manager, Communications Bethpage
Battle Management & Engagement Systems
