

833

March 20, 1914.

Mr. Gano Dunn,

43 Exchange Place, New York.

Dear Mr. Dunn:

I enclose herewith stenographer's transcript of the resolution which you offered at the last Board meeting regarding the request of the International Engineering Congress for space in each issue of the Proceedings from now until the convening of the congress, this space to contain an announcement of the scope and organization of the congress and an application form.

I should be glad if you will return this resolution to me with any revisions that you care to make.

I will add that I have learned that the Secretary of the A.S.C.E., who received a duplicate request, has replied to the effect that the A.S.C.E. cannot comply with the request but that they will be glad to advertise the congress by means of another circular letter mailed to the membership.

The A.S.M.E. has agreed to comply with the request to a limited extent, but not to incorporate this material in every issue.

Very truly yours,

Enc.

Secretary.

March 20, 1914

Resolution Adopted By Board of Directors of A. I. E. E.  
March 13, 1914.

RESOLVED, that the Board of Directors of the American Institute of Electrical Engineers in heartily in sympathy with the International Engineering Congress, and desires to cooperate in every possible way to contribute towards its success. In view, however, of the Institute's obligations to the International Electrical Congress, and the development of work upon it by the various committees at the present time, the Board feels it desirable to give more attention to the organization of the Electrical Congress, and while the Board would be willing to grant certain advertising space to the International Engineering Congress, it would appreciate it if the Congress would make its request at a later date when our own organization is further advanced.
