

CARL HERING, D. Sc.  
CONSULTING ELECTRICAL ENGINEER  
1317 SPRUCE ST.

PHILADELPHIA, PA.

9591  
June 6/23

Dear Mr. Hatchling

I have sold those Trans. & Stecker + the bargain was the complete set. Those sent were packed nearly two years ago, & therefore there are a few more to be sent him.

Will you please let me know the number & date of the last published volume, bound. My last volumes are scattered on account of moving.

Will you continue to publish these bound volumes or discontinue? I suppose to keep our monthly journals & bind them

Yours truly  
Carl Hering

Dr. Carl Hering,  
1317 Spruce Street,  
Philadelphia, Pa.

Dear Dr. Hering:

In reply to your letter of June 6, Volume 40 of the Transactions, containing the 1921 papers and discussions, is the last volume published. The 1922 Transactions are now in the hands of the binder and, from present indications, will be distributed to those members who have entered subscriptions early in July.

Under the publication policy which has been in effect since January 1, 1922, each member receives in the monthly JOURNAL all of the papers and discussions presented at meetings, in addition to a considerable number of other articles and notes not presented at meetings. In other words, there is nothing printed in the Transactions that has not previously been printed in the JOURNAL; but recognizing the fact that some members would prefer to have the papers, discussions and reports in a more convenient bound form for reference, it has been decided to continue to print an edition of the Transactions for those members who wish to subscribe for the same at a nominal cost. I am attaching hereto a copy of the announcement in which this policy was originally brought to the attention of Institute members.

Very truly yours,

Secretary.
